Hyperbaric Medicine Services

As one of the most experienced and comprehensive programs between Orlando and Miami, the Hyperbaric Center at St. Mary’s Medical Center in West Palm Beach, Florida has the knowledge and expertise to treat the full spectrum of emergency conditions and chronic illnesses. Our physicians have more than 50 combined years of experience in hyperbaric medicine and our highly trained clinical team helps physicians deliver hyperbaric medicine for many conditions.

At St. Mary’s, our hyperbaric chambers operate 24-hours-a-day for emergencies and are available during normal business hours for elective care. St. Mary's Hyperbaric Center has one of only a few multi place chambers in South Florida. Patients can sit upright or recline comfortably while reading or watching a movie. If necessary, the chamber can also accommodate patients on stretchers. A nurse, respiratory therapist or paramedic trained in hyperbaric medicine remain in attendance at all times and communicate with a hyperbaric physician as needed. If needed, a trained professional can enter the chamber and quickly be at the patient’s side.

Should you have questions or would like to refer a patient for treatment, please call us at 561-882-2852.

Medicare and most insurance plans recognize hyperbaric oxygen therapy as appropriate treatment for the conditions below.

- Radiation injury
- Chronic refractory osteomyelitis
- Compromised skin flaps and grafts
- Diabetic foot and leg wounds
- Crush injuries
- Acute traumatic peripheral ischemia
- Acute peripheral arterial insufficiency
- Decompression sickness
- Gas embolism
- Carbon monoxide poisoning
- Cyanide poisoning
- Gas gangrene
- Necrotizing fasciitis
- Actinomycosis
